

Yellowfin releases new Twin Pod range

Since the re-launch of Yellowfin the previous year by Telwater Group the brand has strived to re-establish itself as one of the leading plate alloy boat ranges in Australia. And that status has been boosted by the addition of a new range of twin pod cabin models. This not only opens up the appeal of the Yellowfin to offshore boaters who want ultra reliability and safety, but also gives a boost to the ranges appeal to family boaties as well.

The new version features a larger size transom to accommodate twin engines and trim tabs for added stability and handling.

Yellowfin's new Twin Pod Cabins are available in two models; 6200 and 6700 and feature the strength of a welded sub-frame rib structure and self-draining checkerplate floor. Most noticeably the Twin Pod Cabin models differ from the rest of the Yellowfin Cabin range as they have a larger transom to accommodate the twin engines and a greater horse power rating of 230HP for the 6200 and 300HP for the 6700.

Yellowfin Twin Pods are built for serious offshore fishing and are equipped with spacious 1.8m bunks to camp out overnight in search of the perfect catch. National Account

Manager Jason Boal notes the Yellowfin Twin Pod range is built to be not only tough but comfortable too. With this cabin two crew members can sleep below if they wish when on a long overnight fishing trip. Likewise the full-size cabin is handy for holiday boating when you want to camp onboard.

"The twin pod's feature a 20-degree deadrise at the transom and a sharp entry at the bow that allows these boats to carve through the water for a smooth ride," says Jason Boal.

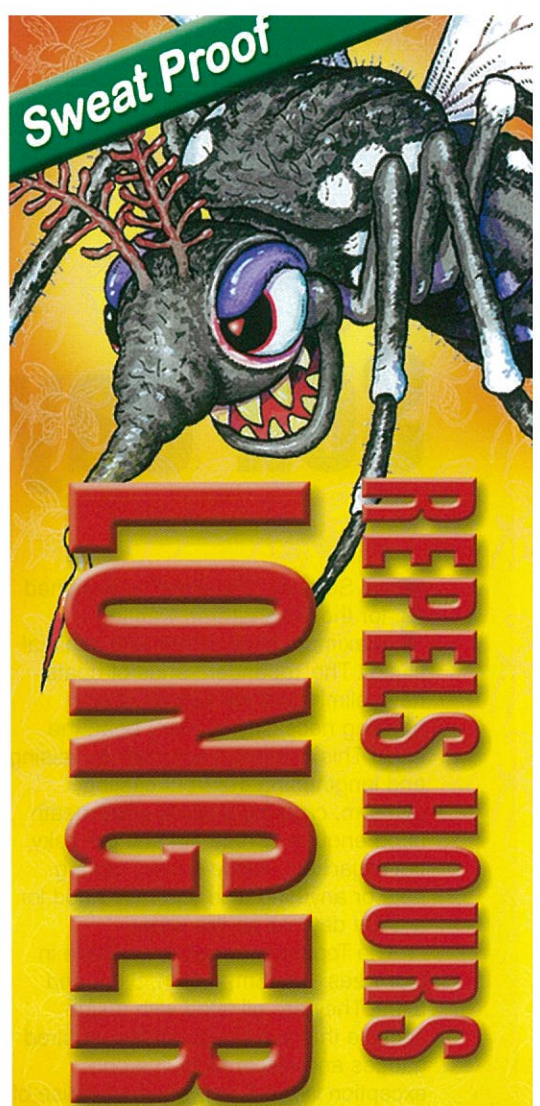

The entire range is constructed from 4mm and 5mm plate aluminium, which will make these boats a cut above the rest in offshore plate boat market.

"All models in the Yellowfin Twin Pod and Cabin range are equipped with the features that offshore fishermen need and are superior value for money," Jason adds.

Yellowfin Twin Pod contain the fishing essentials as standard with a rocket launcher for extra rod storage, hydraulic steering and trim tabs for superb handling, a berley bucket and stainless steel cutting board, 135lt kill tank and 65lt live bait tank.

So you can start exploring the ocean today with a new Yellowfin Cabin boat. The boats are sold through a dealer network so they can be viewed at dealer showroom.
